

Тема лабораторной работы	lb_3.1
Выполняющий	Наглов Виктор
Помогающий	Кутенков Константин
Ход работы	<ol style="list-style-type: none"> 1. Рассмотрели лабораторную работу и приступили к выполнению 2. Открыли запрос на сайт о погоде, который мы делали в предыдущей работе. 3. Открыли его код в значении cURL <div data-bbox="780 535 1382 873" data-label="Image"> </div> 4. Скопировали полученный в консоли запрос типа cURL, скачали дополнение curl для Windows и запустили скопированный запрос в консоли <div data-bbox="732 1084 1382 1449" data-label="Image"> </div> <p>Как мы видим, мы получили ответ в виде прогноза погоды на 5 дней</p> <ol style="list-style-type: none"> 5. Создали HTML файл и заполнили его, согласно инструкции <div data-bbox="780 1659 1382 1872" data-label="Image"> </div> 6. Сохранили данный файл 7. Открыли HTML в Яндексe и открыли

КОНСОЛЬ.

И получили ответ по погоде

Результат

После проделанной нами работы, можно сказать:

1. Узнали что во вкладке Code, в Postman, можно получить различные виды кодов, одного и того же запроса. А сами коды можно копировать и использовать в других утилитах.
2. Мы узнали как отправлять запросы не используя сам Postman, а используя командную строку
3. Поработали с JavaScript (немного)
4. Вспомнили как открывать HTML файлы в браузере, редактировать их и получать ответ от запроса который не визуализируется на

	странице, используя консоль разработчика.
--	---

Программные коды:	
-------------------	--

Исходный код который мы вставляем в консоль:

curl -X GET

```
"api.openweathermap.org/data/2.5/forecast?lat=43&lon=132&appid=21d9c25562e1d099aacac766a4cfa3ff"
```

Полученный код после отправки запроса через консоль:

```
